**Covington Community Enhanced by  
Convenient Outpatient Imaging Center**

(Covington, Washington) Covington Diagnostic Imaging Services (CDIS) will open on April 28 providing imaging services in the heart of the thriving suburb community of Covington.

Located one block northwest of Valley Medical Center's primary care clinic in the new Covington Professional Building, the facility will provide High-field Magnetic Resonance imaging (MRI) on state-of-the-art GE technology. Valley Radiologists, Inc. P.S. will provide imaging interpretation and management for the center. The imaging center will be open Monday through Friday, 8 a.m. to 5 p.m. Valley Orthopedic Associates, SouthLake Clinic and Valley Medical Center Rheumatology will also be tenants in the new building.

"A conveniently located outpatient imaging facility will make seeking medical attention that much easier for the residents of South King County," said Dr. Phil Lund, Valley Radiologists' President. "Valley Radiologists has worked with the Covington community for over 30 years. We are excited to provide clinicians and patients with highly specialized Magnetic Resonance Imaging (MRI), and personalized customer service."

Same-day appointments, fax scheduling, and premier imaging are key elements in the outpatient environment. Fast and accurate consultation and reporting, as well as online access to reports for physicians improve efficiency and care of patients.

Valley Radiologists, Inc. P.S. currently provides imaging services in association with Valley Diagnostic Imaging Services – Olympic Building, Valley Diagnostic Imaging Services– Medical Arts Center, Valley Breast Center, Valley Medical Center, Auburn Regional Medical Center, and Auburn Diagnostic Imaging Services – Merritt Building. The group is made up of more than 25 board certified board certified physicians specializing in diagnostic radiology.
